DETAILED ACTION

Allowable Subject Matter

Claims 1 – 10, 14 – 21, 23 – 33, 35 – 43 and 45 – 49 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Veisz et al. and Applicant's prior art of Hamill both show similar circuits where a circuit is coupled to capacitor having first and second ends but do not show where the capacitance of the capacitor is not nullified. The resonant notched circuits shown by both Veisz et al. (Fig. 2) and Hamill (Fig. 4) both show "notch" circuits due to capacitance cancellation of the capacitor with the respective applied inductance which is shown by the resonant frequency or "notch", thus Veisz et al. and Hamill do not teach or suggest where the capacitance or voltage of the capacitor is not affected.
